George Field

SENIOR SOFTWARE ENGINEER · AI SYSTEMS

Senior software engineer with ten years of shipping software, now focused on AI. I build systems that take repetitive work off people's desks: document pipelines, agentic workflows, Voice AI and LLM features in production apps. I've delivered for Boots and Lloyds through Accenture, worked on DeFi moving \$3B a day, and been an early engineer at fast-moving startups. I do my best work where the problem isn't fully defined and someone needs to connect product, engineering and business value.

Thousands

of documents processed by my AI pipelines at Hours

£300k a year

contract won with a client UI built in one month

100,000

patients in week one of Boots Online Pharmacy

Experience

AUG 2024 – MAY 2026

Senior Software Engineer **Hours**

Second engineering hire, working closely with the CTO. Started as an AI social media platform, then pivoted into a Voice AI SaaS product.

- Built Python pipelines that processed **thousands of documents**, turning unstructured files into clean, structured data for LLM systems.
- Designed and built **agentic flows**, where AI agents call tools and services to complete multi-step tasks on their own.
- Wired LLMs and other AI services into automated production workflows.
- Built and shipped React Native features from first build through to production, plus web features in Next.js and React.
- Balanced speed with stability on mobile, since every release went straight to real users.
- Helped hire the next wave of engineers as the team grew.

MAY 2023 – MAY 2024

Senior Software Engineer **CUB3**

AI and blockchain loyalty platform, built to support millions of users.

- Ran a team of **four engineers**, setting coding standards and mentoring three juniors.
- Built AI document processing pipelines in Python to extract and structure data from unstructured documents.
- Built AI-powered auditing that checks data and flags problems automatically.
- Built dynamic, AI-powered loyalty games for brands and their customers.
- Built a new client UI in one month that secured a **£300,000 a year** contract.
- Led the migration to Next.js, Vercel and Tailwind, and the move off Lambda functions to cut latency.
- Interviewed **25 candidates** for engineering roles.

Jacob Marshall · CPO, Locke

Dr Sam Sutton · Former CTO

Experience, continued

Senior Software Engineer Oasis (now Summer.fi)

- Designed and shipped a DAI Dollar Cost Averaging strategy that turned a manual, gas-heavy process into set-and-forget yield, built to handle transactions of **\$5,000 or more** safely.
- Built a caching layer for Ethereum data that cut requests and sped up response times.
- Created a shared UI component library.
- Fixed and stabilised core parts of the platform, where a mistake put customer money at stake.

Software Engineer Group

- Worked on a large React Native app that helps **thousands of people** run their local communities.
- Designed, built and maintained a full-stack SaaS app with GraphQL, React, Express, Node and TypeScript.
- Rolled out critical Stripe updates that stopped customers losing thousands of pounds in sales.
- Mentored junior developers up to mid-level and worked closely with product on every release.

Software Engineer Accenture, London

- **Boots Online Pharmacy.** Core engineer on the launch team, leading much of the frontend. Took it from greenfield to over **100,000 patients** in the first week, with React components and Node/TypeScript microservices for auth and orders.
- **Boots Single Sign-On.** Lead developer on a Gigya sign-on system that signed up **100,000 users** in its first week.
- **Lloyds Banking Group.** Shipped changes to the mobile banking app used by thousands every day, and supported data migrations processing **9 million records a day**.
- **UK Smart Metering Programme.** Tested and developed firmware-adjacent code, validating devices against DCC standards before field rollout.
- **UX workshops and knowledge sharing.** Ran workshops with clients and their customers, and built an internal tool that helped people share knowledge across the company.
